

**CHARLESTON**  
SIGN MANUFACTURING

MADE IN MISSISSIPPI  
DIVISION OF SIGN FAK, INC.

**PRECISION ROUTED**

Individual three-dimensional letters, numbers, and symbols are perfect for both indoor and outdoor applications. They are cut with precision using computer technology, resulting in long-lasting graphic images when applied to building facades, walls, or used alongside any Charleston Sign Manufacturing architectural signage system.

All dimensional images are cut from aluminum sheet up to 1/2" and finished with a high quality, baked-on paint system.

Based on the installation method required, they are available either with or without welded mounting studs. In addition to our standard aluminum letters, we can also produce precise cut letters and symbols from various other materials, including bronze, muntz metal, brass, stainless steel, acrylic, wood, high-density foam board (SignFoam®), simulated stone products (Corian®, Avonite®, etc.), aluminum composite sheet, and decorative metal laminates.
