

The post and panel system with CSM-200 comes in three different models: 218, 225, and 250

These models are made of aluminum, which makes them durable enough to withstand longterm outdoor use. Choose from both Single and Double Panel options.

Additionally, the 325 and 750 series profiles can be interchanged with these models, giving you more options. This high quality two-inch system is flexible, cost-effective and easy to assemble.

The signage has a uniform appearance, which provides a consistent look and feel to your customers.
