

THE SERIES 325 POST AND PANEL SYSTEM

The 325 Series is a highly versatile component of the Charleston Sign Manufacturing family of architectural signage systems. It is primarily designed for non-illuminated exterior use and is intended for primary site identification and directional information.

This system can be personalized to have a single or double-face copy, and you can choose between rectangular, radius, or full-round posts.

The standard posts come in three lengths - 8', 12', and 24', and it is recommended to have a minimum of 3' below ground. After fabrication, the sign is finished to ensure a uniform appearance.

Choose between mill or custom-painted finishes. You can order it preassembled or in a knock-down form through our QUICKSHIP program for easy assembly on-site. Additionally, the 325 Series offers a "flush face" panel option for a frameless appearance.

FINIALS

Standard finial options available on 218, 225, 250, 325 and 750 series.
